OBJECTIVE

To secure a challenging role in a reputed organization where I can utilize my engineering knowledge. aim to contribute innovative ideas for project development and process improvement. Committed to continuous learning and professional growth

TECHNICAL SKILLS

- Programming Languages: Java, python
- Web technologies : HTML

EDUCATION

VSB college of Engineering Technical campus (Affiliated to Anna University)
B.Tech Artificial Intelligence and Data Science (2023-2027)
CGPA-8.6
Rayar Kalvi Nilayam(2023)
HSC - 80%

PROJECTS

- HEALTHCARE WEB APPLICATION

Developed a Full Stack Healthcare Web Application for Heart Disease Prediction using Machine Learning algorithms.

- AI-BASED INDUSTRIAL WORK SAFETY VIOLATION DETECTION SYSTEM

Developed an AI-powered real-time safety monitoring system using Python, YOLOv8, and OpenCV to detect industrial safety violations such as absence of safety helmets and protective equipment from live CCTV/video streams.

CERTIFICATES

- I have successfully completed a course Python for data science in Great learning.
- I have completed the course Type script in Infosys Springboard.
- I have completed a online course exploring machine learning using python in infosys springboard.

INTERNSHIPS

- I completed Cloud computing internship at litz technology june-july (2025)and gaining the experience in cloud computing and project implementation .
- I also completed inplant training in front-end development from Dec (2025)to jan(2026)and I gaining the experience in creating responsible web pages and project implementation.

DECLARATION

I here by declare that the information provided above is true to the best of my knowledge and belief.
